Sequence 34, Application US/09758881
Patent No. US200100029250A1
GENERAL INFORMATION:
APPLICANT: Karras, James G
TITLE OF INVENTION: Antisense Oligonucleotide Modulation of STAT3
TITLE OF INVENTION: Expression
FILE REFERENCE: ISPH-0532
CURRENT PELLING DATE: 2001-01-11
PRIOR APPLICATION NUMBER: PCT/US00/09054
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 36, Application US/10309362
Publication No. US20030114412A1
Publication No. US20030114412A1
APPLICANT: Donna T. Wart
TITLE OF INVENTION: ANTISENSE MODULATION OF RECQLS EXPRESSION
FILE REPERENCE: RTS-0203
CURRENT APPLICATION NUMBER: US/10/309,362
CURRENT PILING DATE: 2002-12-03
                                                                                                                                                                                       Sequence 35, Application US/10238443

                                     Sequence 12, Application US/09144886

Patent No. US20020155114A1

GENERAL INFORMATION:

APPLICANT: Marks, James D

APPLICANT: Marks, James D

TITLE OF INVENTION: Therapeutic Monoclonal Antibodies That Neutralize

TITLE OF INVENTION: Therapeutic Monoclonal Antibodies That Neutralize

TITLE DF INVENTION: Detailing Neurotoxins

FILE REPERENCE: 2500.117190

CURRENT APPLICATION NUMBER: US/09/144,886

CURRENT FILING DATE: 1998-08-31
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          .

Sequence 145, Application US/09864785

Patent No. US20020177568A1

Patent No. US20020177568A1

APPLICANT: Siboxyme Pharmaceuticals, Inc.

APPLICANT: Siboxyme Pharmaceuticals, Inc.

APPLICANT: Branch Dan

APPLICANT: McSwiggen, Jim

APPLICANT: McSwiggen, Jim

TITLE OF INVENTION: Levels of NP-Kappa B

PILE OF INVENTION: Levels of NP-Kappa B

PILE REFERENCE: 400/022 (MBHB00-812-D)
                                                                                                                                                    Sequence 391, Application US/09792818
Publication No. US20030134806A1
GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Von Carlowitz, Ira
APPLICANT: Von Carlowitz, Jim
APPLICANT: Hamblin, Paul
APPLICANT: Balls, Jonathan
APPLICANT: Blis, Jonathan
TITLE OF INVENTION: Method and Reagent for the Inhibition of Grb-2-related with Inser
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 392, Application US/10163552

Sequence 645, Application US/09848754A

Publication No. US20030073207A1

SEMBRAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
TITLE OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases;
TITLE OF INVENTION: Levels of Epidermal Growth Factor Receptors;
TITLE OF INVENTION: Levels of Epidermal Growth Factor Receptors;
CURRENT APPLICATION NUMBER: US/09/848,754A

CURRENT FILING DATE: 2001-05-03

GENERAL INFORMATION:
BEDITAL OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases or Conditions Relater TITLE OF INVENTION: Levels of Epidermal Growth Factor Receptors
FILE REPERENCE: MBH800-958-1 (400/018)
CURRENT APPLICATION NUMBER: US/09/848,754A
CURRENT FILING DATE: 2001-05-03
NUMBER OF SEQ ID NOS: 9645
                                                                                                                                                                                                                                                                                                                                               Patent No. USZO020177568A1

Patent No. USZO020177568A1

GENERAL INCEMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Ribozyme Dan

APPLICANT: Brinchcomb, Dan

APPLICANT: Braper, Ken

APPLICANT: McSwiggen, Jim

Sequence 4787, Application US/10289762
Publication No. US20040006218A1
GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: Chlamydia pneumoniae genomic sequence and polypeptides, fragments
TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, prever
TITLE OF INVENTION: and treatment of infection
FILE REFERENCE: 9710-003-999
CURRENT APPLICATION NUMBER: US/10/289,762
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps
